Storage Networking Solutions Version 2

Q&A

DEMO Version

Copyright (c) 2007 Chinatag LLC. All rights reserved.

Important Note Please Read Carefully

For demonstration purpose only, this free version Chinatag study guide contains **10** full length questions selected from our full version products which have more than **200** questions each.

This Study guide has been carefully written and compiled by Chinatag certification experts. It is designed to help you learn the concepts behind the questions rather than be a strict memorization tool. Repeated readings will increase your comprehension.

For promotion purposes, all PDF files are **not** encrypted. Feel free to distribute copies among your friends and let them know Chinatag website. Our IT certification products start at only **\$10.99**.

Study Tips

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions. Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 180 days after the purchase. You should check the products page on the <http://www.chinatag.com> website for an update 3-4 days before the scheduled exam date.

Please tell us what you think of our products. We appreciate both positive and critical comments as your feedback helps us improve future versions. Feedback on specific questions should be send to feedback@chinatag.com.

Thanks for purchasing our products and look forward to supplying you with all your Certification training needs.

Good studying!

QUESTION NO: 1

What N series Data ONTAP standard feature enables authenticated, command-line based administrative sessions between an N series system via the internet?

- A. LockVault
- B. SnapAdmin
- C. VlanAdmin
- D. SecureAdmin

Answer: D

QUESTION NO: 2

TestKing.com has ten branch offices with N5500 systems and a headquarters location with an N7600. They replicate their data by using SnapVault primary on the branch office systems and SnapVault secondary for the centralized storage located at headquarters. Now they would like to create a second copy of their headquarters N7600 system. What software feature do they need to install on the N7600 if they would like to replicate their data to an additional N7600 system they just purchased?

- A. SyncMirror
- B. SnapDup
- C. SnapVault secondary
- D. SnapMirror

Answer: D

QUESTION NO: 3

TestKing.com is considering the use of a file server to store large circuit designs for its design engineering users. The users are geographically dispersed and frequently update their designs. The workstations used include UNIX, Linux, and Microsoft Windows. Which of the following would be the best fileserver solution install?

- A. UNIX file server
- B. IBM NAS Gateway 500
- C. IBM System Storage N series System
- D. Windows 2003 fileserver

Answer: C

QUESTION NO: 4

TestKing.com has 24 servers, an eight-host port IBM DS4800, and eight single-port tape drives that are all SAN-attached. The customer needs redundant disk connectivity and connection to tape. To follow best practice, how many 32-port switches are needed to implement a LAN-free backup solution?

- A. 4
- B. 2
- C. 3
- D. 1

Answer: C

QUESTION NO: 5

A company is developing a disaster recovery plan. They are currently working on a Business Impact Analysis. At this stage, which of the following steps is most important?

- A. Define recovery objectives and timeframe.
- B. Identify viable recovery strategies.
- C. Develop exercises with external agencies.
- D. Identify potential risks to the company.

Answer: A

QUESTION NO: 6

TestKing.com has 180 Windows servers, 40 AIX servers, 120 Linux workstations, and 20 SAP servers connected via SAN to a disk storage subsystem. Now the customer has decided to simplify their storage infrastructure. What solution can handle all environments?

- A. IBM Virtualization Engine TS7510
- B. IBM DR550
- C. IBM TotalStorage Productivity Center
- D. IBM System Storage N series

Answer: D

QUESTION NO: 7

Assuming TestKing.com has five 32-port switches, how many ports are left if they would like to build an any-to-any fabric with a max of one hopcount?

- A. 135
- B. 138
- C. 140
- D. 160

Answer: C

QUESTION NO: 8

TestKing.com has an IBM System p server with eight HBAs in a single LPAR. The server is connected to an IBM SAN Volume Controller (SVC) cluster. What is the maximum number of paths to each vDisk that the SVC will support in this configuration?

- A. 16
- B. 4
- C. 32
- D. 8

Answer: D

QUESTION NO: 9

TestKing.com just unpacked his N7000 cluster system and ready to perform initial installation. Customer wants to configure the system with a high-availability configuration. Which of the following is required for interconnect?

- A. NVRAM5 in slot 3
- B. NVRAM6 in slot 2
- C. NVRAM6 in slot 1
- D. NVRAM5 in slot 1

Answer: C

QUESTION NO: 10

TestKing.com is running DataONTAP 7.2 and Autosupport is enabled in order to continue monitoring the health of customer's N series systems. Which of the following transport protocols is supported by IBM Autosupport?

- A. SNMP
- B. HTTP
- C. HTTPS
- D. SMTP

Answer: C
