**Novell eDirectory Design and
Implementation : eDirectory 8.8**

Q&A

DEMO Version

Copyright (c) 2007 Chinatag LLC. All rights reserved.

Important Note Please Read Carefully

For demonstration purpose only, this free version Chinatag study guide contains **10** full length questions selected from our full version products which have more than **200** questions each.

This Study guide has been carefully written and compiled by Chinatag certification experts. It is designed to help you learn the concepts behind the questions rather than be a strict memorization tool. Repeated readings will increase your comprehension.

For promotion purposes, all PDF files are **not** encrypted. Feel free to distribute copies among your friends and let them know Chinatag website.

Study Tips

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions. Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check the products page on the <http://www.chinatag.com> website for an update 3-4 days before the scheduled exam date.

Please tell us what you think of our products. We appreciate both positive and critical comments as your feedback helps us improve future versions. Feedback on specific questions should be send to feedback@chinatag.com.

Thanks for purchasing our products and look forward to supplying you with all your Certification training needs.

Good studying!

QUESTION 1

Which replica type contains only the partition root object?

- A. Master
- B. Read-only
- C. Read/Write
- D. Filtered replica
- E. Subordinate reference

Answer: E

QUESTION 2

Which statements are true regarding the placement of eDirectory objects? (Choose 2.)

- A. Place application objects in their own container.
- B. Don't place user objects near the top of the tree.
- C. If possible, don't place objects deep within a tree.
- D. If possible, don't place server objects within the same container.
- E. Server objects should be placed near the user objects they are servicing.

Answer: C, E

QUESTION 3

Exhibit:

050-895

Server	[Root]	Engineering	Marketing	Testing	PR
Serv1	Master	Master	Master	Master	Master
Serv2	R/W		R/W		
Serv3		R/W		R/W	
Serv4	R/W				R/W
Serv5	R/W		R/W		
Serv6	R/W	R/W			

How many subordinate references will exist in this tree?

- A. 3
- B. 5
- C. 6
- D. 7
- E. 8
- F. 9
- G. 12

Answer: E

QUESTION 4

Which of the following is most important to consider when designing the upper layers of an eDirectory tree?

- A. Time synchronization strategy
- B. Number of objects in the tree
- C. Number of servers in the tree

- D. Physical network infrastructure
- E. Number of partitions and replicas

Answer: D

QUESTION 5

What is the most important design consideration when designing the upper layers of an eDirectory tree?

- A. Partition and replica plan
- B. Time synchronization strategy
- C. Number of objects in the tree
- D. Number of servers in the tree
- E. Physical network infrastructure

Answer: E

QUESTION 6

What is a part of analyzing user needs when creating an accessibility needs analysis document?

- A. Design a strategy for mobile users.
- B. Specify ZENworks object configurations.
- C. Specify security rights to particular objects.
- D. Gather information related to physical network resource needs.
- E. Create guidelines that determine how eDirectory objects are used to create the user environment.

Answer: D

QUESTION 7

What tasks are helpful in completing a needs analysis when designing an eDirectory tree? (Choose 2.)

- A. Gather information about network connectivity
- B. Gather information about resources that users access
- C. Gather information to decide on a replica placement strategy
- D. Gather information to estimate the time for each phase of design
- E. Gather information to decide which server should be the time provider

Answer: A, B

QUESTION 8

Which statement is true about eDirectory partitions?

- A. Partitions can overlap each other.
- B. A container object can reside in 2 partitions.

- C. A partition provides fault tolerance for the file system.
- D. Partitions are logical divisions of eDirectory that enable the database to be divided among several servers.

Answer: D

QUESTION 9

Which statement is true regarding the Priority Sync feature?

- A. Priority Sync is supported only between two or more eDirectory 8.8 servers hosting any partition.
- B. Priority Sync is supported only between two or more eDirectory 8.8 servers hosting the root partition.
- C. Priority Sync is supported only between two or more eDirectory 8.8 servers hosting the same partition.
- D. Priority Sync is supported only between two or more eDirectory 8.8 servers hosting parent or child partitions.

Answer: C

QUESTION 10

Which statement is true regarding the function-based design for the upper layers of your eDirectory tree?

- A. It is the best design type to handle future growth.
- B. It should be used if there is a WAN in the network.
- C. It is best for small networks that do not span more than one location.
- D. It is a more difficult type of design for the upper layers of your tree.
- E. It should be used if there are multiple organization objects in the tree.

Answer: C
