**BEA Certified Support Associate: WebLoalc Server 9/10**

Q&A

DEMO Version

Copyright (c) 2007 Chinatag LLC. All rights reserved.

## **Important Note Please Read Carefully**

For demonstration purpose only, this free version Chinatag study guide contains **10** full length questions selected from our full version products which have more than **200** questions each.

This Study guide has been carefully written and compiled by Chinatag certification experts. It is designed to help you learn the concepts behind the questions rather than be a strict memorization tool. Repeated readings will increase your comprehension.

For promotion purposes, all PDF files are **not** encrypted. Feel free to distribute copies among your friends and let them know Chinatag website.

## **Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions. Go through the entire document at least twice so that you make sure that you are not missing anything.

## **Latest Version**

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check the products page on the <http://www.chinatag.com> website for an update 3-4 days before the scheduled exam date.

Please tell us what you think of our products. We appreciate both positive and critical comments as your feedback helps us improve future versions. Feedback on specific questions should be send to [feedback@chinatag.com](mailto:feedback@chinatag.com).

Thanks for purchasing our products and look forward to supplying you with all your Certification training needs.

Good studying!

Technical and Support Team  
Chinatag LLC.

**Questions: 1**

What are the three different types of watches provided by the WebLogic 9.x Diagnostic Framework?

- A. MBean, Harvester, Log
- B. Harvester, Log, Instrumentation
- C. Alarm, Notification, Log
- D. Severity, Alarm, Harvester

**Answer: B**

**Questions: 2**

A single JMS server with a queue and a topic is configured for application-related JMS messages on a single WebLogic instance. JMS statistics showed that some of the queue messages are lost and not delivered to the application. Which one of the following would help in tracing each message in the system by tracking the message life cycle events?

- A. Enabling JMS debugging
- B. Enabling queue message logging
- C. Deleting the queue and reconfiguring the application to use topic
- D. Enabling topic message logging

**Answer: B**

**Questions: 3**

It was noticed that a high amount of pending messages backlogged in a JMS destination, to solve the problem the recommendation is to:

- A. Restart the JMS Server for the recovery of pending messages
- B. Tune the JMS Message thresholds for paging pending messages
- C. Purge the messages off the JMS destination from the admin console or with WLST
- D. Use thread dumps and JMS debug flags; establish flow to determine the root cause of the backlog

**Answer: D**

**Questions: 4**
