Acme Packet Certification Exams

Q&A

DEMO Version

Copyright (c) 2007 Chinatag LLC. All rights reserved.

Important Note Please Read Carefully

For demonstration purpose only, this free version Chinatag study guide contains **10** full length questions selected from our full version products which have more than **200** questions each.

This Study guide has been carefully written and compiled by Chinatag certification experts. It is designed to help you learn the concepts behind the questions rather than be a strict memorization tool. Repeated readings will increase your comprehension.

For promotion purposes, all PDF files are **not** encrypted. Feel free to distribute copies among your friends and let them know Chinatag website.

Study Tips

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions. Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check the products page on the <http://www.chinatag.com> website for an update 3-4 days before the scheduled exam date.

Please tell us what you think of our products. We appreciate both positive and critical comments as your feedback helps us improve future versions. Feedback on specific questions should be send to feedback@chinatag.com.

Thanks for purchasing our products and look forward to supplying you with all your Certification training needs.

Good studying!

Question: 1

The Net-Net 4000 is the source and destination for all signaling messages and media streams coming into and leaving the provider's network. Which two of the following SIP functions does it provide?

- A. edge proxy
- B. registrar
- C. Back to Back User Agent
- D. media gateway

Answer: A, C

Question: 2

Which two of the following statements about SIP response code handling on the Net-Net 4000 are TRUE?

- A. The Net-Net 4000 will originate a 403 Forbidden response when bandwidth allocated to a realm has been exhausted.
- B. The Net-Net 4000 cannot originate 3xx class redirect responses.
- C. The Net-Net 4000 egress realm selection may be affected by received third party 3xx class redirect responses
- D. The Net-Net 4000 can transmit a different SIP response code than it received.

Answer: C, D

Question: 3

In an H.323 network, a _____ provides translation services and communication between dissimilar networks.

- A. gatekeeper
- B. gateway
- C. multipoint control unit
- D. codec

Answer: B

Question: 4

A steering pool defines _____.

- A. a range of IP addresses used to route media flows as they egress the box
- B. a range of IP addresses and a pool of ports Net-Net 4000 will use to declare itself as the destination for all subsequent media flows in a dialog
- C. an IP address and range of ports the Net-Net 4000 will use to declare itself as the destination for media flows in a session
- D. an IP address and port the Net-Net 4000 uses for steering media to the external media server

Answer: C

Question: 5

Which two of the following statements regarding SIP processing are FALSE?

- A. An initial INVITE will contain a From header tag and a To header tag as a globally unique identifier for the dialog.
- B. To avoid retransmissions, User Agents must forward received 100 Trying messages to their next hop.

- C. Calls Per Second are typically measured using a 7-10 message SIP call flow including call setup and tear down.
- D. The combination of the To tag, From tag, and Call-ID completely defines a peer-to-peer SIP relationship and is referred to as a dialog.

Answer: A, B

Question: 6

High availability (HA) nodes identify one another by their _____ names.

- A. Identifier
- B. Host
- C. mib-system-name
- D. target

Answer: D

Question: 7

If upon examination of two configuration files you notice that the version number of the permanently saved configuration differs from the version number of the running configuration, it means that _____.

- A. the saved configuration file has been edited, but the done command was not issued
- B. the saved configuration file has been copied from flash into SDRAM using the save-config command
- C. the saved configuration file has been saved into flash, but the activate-config command has not been issued
- D. the saved configuration file was copied from flash into SDRAM using the activate-config command

Answer: C

Question: 8

Which one of the following statements about H.323 networks is FALSE?

- A. The collection of all terminals, gateways, and MCU managed by a single gatekeeper is known as an Autonomous System (AS).
- B. Gateways are not mandatory in an H.323 network.
- C. Gatekeepers are not mandatory in an H.323 network.
- D. Gateways translate call set-up messages and convert media formats.

Answer: A

Question: 9

The default baud rate for console connections to the Net-Net 4000 is _____.

- A. 115200
- B. 2400
- C. 9600
- D. 56600

Answer: A

Question: 10

In a high availability (HA) scenario, if peers boot simultaneously and their health scores are equivalent, which node automatically assumes the role of Active?

- A. The node that had the role of active last.
- B. The node that had the role of standby last.
- C. The node with the highest Wancom IP address.
- D. The node with the lowest Wancom IP address.

Answer: D
