## **Important Note Please Read Carefully**

For demonstration purpose only, this free version Chinatag study guide contains **10** full length questions selected from our full version products which have more than **200** questions each.

This Study guide has been carefully written and compiled by Chinatag certification experts. It is designed to help you learn the concepts behind the questions rather than be a strict memorization tool. Repeated readings will increase your comprehension.

For promotion purposes, all PDF files are **not** encrypted. Feel free to distribute copies among your friends and let them know Chinatag website. Our IT certification products start at only **\$10.99**.

## **Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions. Go through the entire document at least twice so that you make sure that you are not missing anything.

## **Latest Version**

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 180 days after the purchase. You should check the products page on the <http://www.chinatag.com> website for an update 3-4 days before the scheduled exam date.

Please tell us what you think of our products. We appreciate both positive and critical comments as your feedback helps us improve future versions. Feedback on specific questions should be send to [feedback@chinatag.com](mailto:feedback@chinatag.com).

Thanks for purchasing our products and look forward to supplying you with all your Certification training needs.

Good studying!

**QUESTION NO: 1**

Which two have the most direct impact on the performance of Select Identity? (Choose two.)

- A. database
- B. load balancer
- C. directory server
- D. network latency
- E. application server
- F. single sign-on system

**Answer: A,E**

**QUESTION NO: 2**

What are two areas in which XML-based proprietary messages are used in the Select Access dataflows? (Choose two.)

- A. communication between Enforcers and Validators
- B. communication between Administration Servers and Validators
- C. communication between Validators and LDAP directory servers
- D. communication between Administration Servers and LDAP directory servers

**Answer: A,B**

**QUESTION NO: 3**

Which two functions does Select Identity's Web services API allow you to handle? (Choose two.)

- A. reconciliation
- B. connector creation
- C. workflow approvals
- D. external call-out creation
- E. password synchronization

**Answer: A,E**

**QUESTION NO: 4**

Which component in Select Identity is responsible for managing the logical grouping of users and the services they can access?

- A. Enforcer
- B. Validator
- C. Rules Engine
- D. Context Engine
- E. Administrative Server

**Answer: D**

**QUESTION NO: 5**

With Select Identity, what is a valid reason to use an external call-out?

- A. to provision to a standard third-party software application
- B. to authorize and authenticate to a single sign-on application
- C. to map attributes between Select Identity and a target resource
- D. to connect to a home-grown application to read and/or write data

**Answer: D**

**QUESTION NO: 6**

You create a business service in Select Identity that provisions five pieces of data (first name, last name, e-mail address, user ID and phone number) per user to an LDAP repository. The user is successfully provisioned, but when you check the LDAP repository, the phone number for all the users is missing.

What should you do to troubleshoot this problem?

- A. ensure that the phone number attribute is included in the necessary e-mail notification template
- B. ensure that the phone number attribute is marked as "Updateable" in the Self-Service Permission field in Attribute management
- C. ensure that the phone number attribute in Select Identity is mapped to the respective phone number field in the proper LDAP resource
- D. ensure that the phone number attribute name in Select Identity has the same spelling as the phone number field in the LDAP resource

**Answer: C**

**QUESTION NO: 7**

In which manual are known issues with the Select Access installer/uninstaller documented?

- A. Select Access Release Notes
- B. The Select Access Install Guide
- C. The Select Access Network Integration Guide
- D. The Select Access Developer Reference Guide

**Answer: A**

**QUESTION NO: 8**

Which four statements are true about troubleshooting of Select Access operations?  
(Choose four.)

- A. The Secure Audit Server cannot log trace messages.
- B. The Select Access Debug Server reduces Validator throughput.
- C. The query tool can conveniently check a single policy query outcome.
- D. Setting Secure Audit Settings to Debug will increase Validator logging.
- E. The query tool can usefully isolate Select Access issues from application issues.
- F. Running the Validator in debug and trace mode stops logging to a Secure Audit Server.

**Answer: A,C,E,F**

**QUESTION NO: 9**

A request for adding a user to a service has been submitted in Select Identity. The delegated requestor believes that the request is taking too long.

How can you track the current workflow activity of the request?

- A. check the database log files
- B. run an active request report in audit reports
- C. check the Web services log file to trace the inbound and outbound SPML requests
- D. view the request in request status and drill down to the specific workflow instance for the request

**Answer: D**

**QUESTION NO: 10**

Custom Select Access Validator plug-ins provide extensions to add support for which two capabilities? (Choose two.)

- A. new workflow methods
- B. new reconciliation rules
- C. new decision point rules
- D. new authentication methods

**Answer: C,D**

**QUESTION NO: 11**

Company A wants to allow administrators of Company B to add Company B employees to the Select Access user repository of Company A. No other administration capability needs to be delegated.

Which two actions achieve this result? (Choose two.)

- A. allow Company B administrators to use the HTML forms-based administration interface only
- B. allow Company B administrators to use the HTML forms-based administration interface but only for access policy management
- C. allow Company B administrators to use the main Select Access administrator's applet and restrict their capability to user administration only
- D. allow Company B administrators to use the applet-based administration Policy Builder interface only and restrict the capability to user administration only

**Answer: A,D**

**QUESTION NO: 12**

What are two methods of discovering Web pages as Select Access resources? (Choose two.)

- A. launch a scan of the HTTP Web pages from the Policy Builder
- B. use a Validator plug-in to obtain the list of Web pages and store it directly in the LDAP directory server
- C. configure the Enforcer on the Web server to push the list of Web pages to the Policy Builder via the Validator
